magicka the other side of the coin. magicka other side of the coin crash. magicka other side of the coin healing. magicka the other side of the coin walkthrough. magicka other side of the coin vlad

you play as the coolest villian out of any game ever made, EVER, in the game, also game difficulty is increased by 75%, reason for that is.. You can kill wooden unicorns it's worth everything. very good but no saves :(how did any of these guys below not finish this dlc in one hour why would you need saves use the time warp for vlad, too. not exactly worth 5 bucks, as opposed to the stars are left, by the way. It's cool, but eh. at least there's the challenge maps.. One of the poorest designed boss fights I've ever seen. Not fun in the slightest.
